

P PATIENT & CONSULTATION DETAILS

Patient Name	: Rahul Sharma	Doctor ID	: default-doctor
Patient ID	: patient-001	Date	: 15 Aug 2026
Age / Gender	: -	Time	: 04:23 pm
Appointment ID	: 1	Consultation Type	: General Consultation

1 1. CONSULTATION OVERVIEW

Chief Complaint

Fever, dry cough, throat irritation, and pain when swallowing.

Consultation Overview

Patient presented with fever, dry cough, mild cold, throat irritation, slight pain on swallowing food, headache, and weakness since yesterday evening. On examination, the doctor noted mild throat redness and dry cough, diagnosing a viral upper respiratory infection. Symptomatic medications and fluid intake were recommended.

History of Present Illness

Patient experienced fever starting yesterday at 6:00 PM, measuring around 101°F at home. Reports dry cough, mild cold, throat irritation, slight pain when eating food, headache, and weakness since morning. Breathing is currently normal, with no chest pain, vomiting, loose motions, or stomach pain. Patient traveled last night for work and has been drinking less water due to throat irritation.

2 2. CLINICAL HISTORY

Symptoms

- Fever
- Dry cough
- Mild cold
- Throat irritation
- Pain on swallowing food
- Headache
- Weakness

3 3. EXAMINATION & VITALS

Examination Findings

- Throat is mildly red
- Slight dry cough present on examination

Vital Signs	Value	Parameter	Value
Temperature	100 degrees Celsius	Blood Pressure	Normal
Heart Rate / Pulse	Slightly high	SpO2	98%

4 4. CLINICAL ASSESSMENT & PLAN

Assessment	: Viral upper respiratory infection.
Diagnosis	: Viral upper respiratory infection
Treatment Plan	: Prescribed paracetamol for fever, cough syrup for dry cough, and vitamin supplements. Recommended drinking 2-3 liters of fluids daily, taking medicines on time, and getting enough sleep.

5. ADVICE & FOLLOW-UP

Advice

- Drink at least 2 to 3 liters of fluids daily
- Take medicines on time
- Get enough sleep

Follow-up

Visit the hospital immediately if breathing difficulty, severe chest pain, continuous vomiting, confusion, or oxygen saturation below 94% develops.

Doctor Notes

Antibiotics are not needed at present as viral infections do not require antibiotics unless there is evidence of a bacterial infection.

Red Flags / Warnings

Breathing difficulty, Severe chest pain, Continuous vomiting, Confusion, Oxygen level drops below 94%

Rx 6. PRESCRIPTION

7. CONSULTATION TRANSCRIPT

Patient

[00:00] Hello doctor.

Doctor

[00:01] How are you? I'm good. What about you?

Patient

[00:05] Yeah, doctor. I'm good.

Doctor

[00:07] What happened? Tell me. What is your problem?

Patient

[00:12] I'm having difficulty in breathing, doctor.

Doctor

[00:16] Okay.

Patient

[00:17] And
also I'm having
fever from
yesterday 6:00
PM, doctor.

Doctor

[00:25] Okay,
did you check
your
temperature?

Patient

[00:27] No
doctor. Yes
doctor, I have
checked it. It is
around 101
degrees fever.

Doctor

[00:33] Apart
from fever, do
you have
cough or cold?

Patient

[00:36] Dry
cough. Cold is
cold is very
mild, but throat
irritation, I
have throat
irritation also.

Doctor

[00:46] Sore
throat or did
you find
difficulty in
swallow by
swallowing or
pain?

Patient

[00:52] Slight
pain, doctor.
Water taagithe
ok undi, but
food tine
tapudu little
discomfort
undi.

Doctor

[01:00] Any
breathing
difficulty, chest
pain?

Patient

[01:03] No
doctor,
breathing
normal ga
undi, chest
pain ledha.

Doctor

[01:05]
Headache
ledha
dizziness

Patient

[01:07]

Headache
undi. Morning
nunchi
weakness
kuda feel
avtunnanu.

Doctor

[01:11]

Vomitings,
loose motions
or stomach
pain emyna?

Patient

[01:15]

No
doctor, avemi
levu.

Doctor

[01:17]

Appetite ela
undi? Properly
tintunara?

Patient

[01:21]

Yeah,
good. Good
doctor.
Appetite is
good.

Doctor

[01:31]

Water,
did you take
plenty of water?

Patient

[01:33]

Not
much doctor.
Throat
because of
throat irritation,
I'm taking very
less water.

Doctor

[01:39]

Did you
travel?

Patient

[01:41]

No
doctor. Yes
doctor, I had
travel
yesterday night.

Patient

[01:49]

On
basis of work.

Doctor

[01:53]

Okay,
done.
Temperature is
100 degrees
Celsius. Pulse
is slightly high
because of
fever. Blood
pressure is
normal.
Oxygen

saturation is

98%, which is
good.

Patient

[02:07] Okay
doctor.

Doctor

[02:08] Please
open your
mouth, let me
examine your
throat. Your
throat is mildly
red. I can hear
you hear a
slight dry
cough. At
present, it
looks like a
viral upper
respiratory
infection. Most
viral fevers
improve within
3 days to 5
days.
Antibiotics
avasarama
doctor? Ledhu,
right now you
don't need
antibiotics.
Viral infections
usually don't
require
antibiotics
unless there is
evidence of
bacterial
infection,
okay? I'll
prescribe
paracetamol
for fever,
cough cough
syrup for dry
cough, and
vitamin
supplements.
Drink plenty of
water, okay?

Patient

[02:46] Yeah
doctor.

Doctor

[02:47] If you
develop
breathing
difficulty,
severe chest
pain,
continuous
vomiting,
confusion, or
oxygen level
drops below
94%, visit the
hospital

immediately.

Patient

[02:57] Okay
doctor, thank
you.

Doctor

[02:59] Take
the medicines
on time. Drink
at least 2 to 3
liters of fluids
and get
enough sleep.

Patient

[03:05] Okay
doctor, thank
you. I'll follow
this.
