

P PATIENT & CONSULTATION DETAILS

Patient Name	: Rahul Sharma	Doctor ID	: default-doctor
Patient ID	: patient-001	Date	: 16 Aug 2026
Age / Gender	: -	Time	: 12:47 am
Appointment ID	: 1	Consultation Type	: General Consultation

1 1. CONSULTATION OVERVIEW

Chief Complaint

Back pain for 5 months.

Consultation Overview

Patient Sai Teja presented with back pain of 5 months duration, aggravated by heavy weightlifting at the gym and prolonged sitting.

History of Present Illness

The patient reports back pain for the past 5 months, which makes sitting for a long time difficult. Patient recently started gym workouts involving heavy weightlifting.

2 2. CLINICAL HISTORY

Symptoms

- Back pain
- Inability to sit for long duration

4 4. CLINICAL ASSESSMENT & PLAN

Assessment	: Possible lumbar disc problem secondary to heavy weightlifting.
Treatment Plan	: Doctor mentioned prescribing oral medication, an injection, and a specific diet plan, along with strict activity modifications.

5 5. ADVICE & FOLLOW-UP

Advice

- Avoid lifting heavy weights
- Avoid sitting down on the floor
- Follow the prescribed diet strictly from day 1
- Avoid outside junk food completely

Follow-up

Observe changes over at least 8 months following the prescribed regimen.

Rx 6. PRESCRIPTION

S. No.	Medicine	Dosage	Frequency	Duration	Instructions
1	Injection	-	-	-	Doctor mentioned prescribing an injection along with oral medication.

Important Note

This prescription is based on the current consultation only. Do not self-medicate. Consult again if symptoms persist or worsen.

Patient [00:00]	Hello doctor.
Doctor [00:02]	Hello Sai Teja. What happened?
Patient [00:05]	I have been experiencing back pain since I started my new job. The pain is mostly in the lower back and it gets worse when I sit for long periods or lift heavy boxes. It's been about 3 weeks now.
Doctor [00:17]	How often does the pain occur? Is it constant or intermittent?
Patient [00:23]	The pain is intermittent. It usually occurs after sitting for more than 1 hour or lifting something heavy. Sometimes it wakes me up at night.
Doctor [00:26]	Do you have any other symptoms like numbness or tingling in your legs?
Patient [00:33]	No, there are no numbness or tingling sensations.
Doctor [00:43]	Possibility of lifting heavy weights. You should avoid lifting heavy weights, bending over, or sitting for long periods. Try to take short breaks every 30 minutes if you have to sit. I'll prescribe a diet for you. Follow the diet from day 1 only. If you don't see improvement in 2 weeks, we may need to consider further treatment. If possible avoid it completely. For at least 8 months you can observe changes.
Patient [01:44]	Thank you doctor.
